## Measures of success

# 2. Research and innovation

Through our commitment to conducting world-leading discovery research and collaborating with our partners to translate our research discoveries, we seek to not only create new knowledge but share it in ways that enrich our communities, our economy and the environment.

### **Partnerships**

Our goal is to foster mutually beneficial partnerships for research translation and commercialisation at scale, to create positive impact for our communities, the environment and economy.

## How we are achieving this

In preparing to develop a new partnerships and translation strategy, we implemented a Research Partnerships Review that saw both a Community of Practice and a Pipeline of Projects and Partners through the UQ Commercialisation Action Plan established during the year. This will feed into the Research Roadmap implementation as well as the convening of a cross-organisational partnership community.
